Authorized as Second Class Mail, Post Office Department, Ottawa

VOLUME 32: No. 6

ACME, ALBERTA, THURSDAY, MARCH 12th, 1953

\$1.50 a Year; 5c a Copy

## LOCALS

The Farmers' Bonspiel started Wed., March 11th after being postponed twice because of the weather.

The Junior Ladies' Aid will hold a Spring Tea and Apron Sale in the Legion Hall on Saturday, March 28th from 3:00 to 6:00 o'clock.

Carbon Curling Club is holding a meeting on Friday, March 13th to discuss plans for building the new curling rink. An estimate has been made and a committee has drawn up plans to be approved by the club. The cement has already been purchased and work will get under way as soon as the weather permits.

In the mixed bonspiel, the winning teams were as follows:

### FIRST EVENT

1. K. Halstead.
2. L. Trepanier.

### SECOND EVENT

1. Al Barnes.
2. L. Halstead.

### THIRD EVENT

1. Leo Brown.
2. Dick Garrett, Jr.

Mrs. Stan Torrance is spending the week in Calgary visiting with friends.

Have you paid your subscription lately? Mail or give it to Mrs. D. A. Prowse.

The Gamble Ladies' Aid is holding a Bake Sale in the Legion Hall on Sat., April 4th.

Mr. Ron Sommerville who has been visiting relatives in Carbon has left for Cranbrook where he will take up permanent residence as manager of "The Palm" corner confectionery.

The Carbon Legion will be holding a Donation Dance in the new hall on Tuesday, March 17. Everybody is welcome. Come and see the new hall and support the local branch of the Canadian Legion.

Members of the Carbon United Church and Rosebud United Church will present a Minstrel Show and a play titled "Uncle George Pops In" on Wed., March 25th in the Scout Hall. Remember this date and make plans to spend an enjoyable evening watching local as well as imported talent.

Little Diane Hay is a patient in the Three Hills hospital.

March 14th is the date set for the Home Cooking Sale sponsored by the Anglican W. A. It will be held in the new Legion Hall.

On Sunday, March 8th a very enjoyable program was presented by the Drumheller mixed choirs. This was sponsored by the Carbon Students Union and it is to be hoped that more entertainment of this quality will be brought to Carbon.

Joe Berlando is the conductor of the chorus, Mrs. Harvey accompanied the solo numbers and Mrs. Hillborn accompanied the chorus.

The following is the program:

1. O Canada.
2. St. Matthew's Passion—Johann Sebastian Bach.
3. Now Spring in All Her Glory—Jacques Arkadelt.
4. Ave Verum—Mozart.
5. Miss Jerry Hillborn, Piano—Norwegian Bridal Procession—Edward Grieg.
6. Mrs. Semcka, Soprano—Bells of St. Mary's—Adams.
7. When Song is Sweet—Sans Souci.
8. Harry Laslop, Violin—Meditation From Thais—Massinet.
9. Elfentanz—Jenkinson.
10. Tea for Two—Vincent Youmens.
11. Green Bottles (Male Voices)—Traditional.
12. With Jockey to the Fair—arr.

Gordon Jacob.

Intermission.

10. Moore's Song to Music—Eric Thimen.

11. Lover Come Back to Me (Ladies' Voices).

12. Alouette—Lynn Murray.

13. R. B. Smith, Baritone—Sylvia—Oley Speeks.

Three For Jack—Squire.

14. Saxophone Sextette—Song of India—Rimski Korsokof.

Coronation March—Myerlius.

15. Miss Wally Toth, Soprano—Pale Moon—Fred Logan.

Kashmere Day—Hope.

16. Miss Caroline Anderson, Piano—Londonderry Air—Grainger.

Miller's Dance—De Falla.

17. Little David—Malcolm Sargent.

18. Dry Bones—Russell Watson.

19. The Swazi Warrior—Thos. Wood.

God Save the Queen.

## CREDIT DUE

Great credit is due to the various forms of immunization for the low incidence of some of the contagious diseases which once were epidemic in this country. Smallpox, diphtheria and whooping cough are all preventable diseases and children may be rendered immune to them by simple preventive methods. In most communities, such immunization is available free of charge and no youngster should be without this protection.

## THRILLS of the ROARIN' GAME

### Origin Of Game Shrouded In The Mists Of Antiquity

The day, decade, year or century that saw the birth of the grand game of Curling is something beyond the ken of historians.

Like all things else that exist it must have had somewhere and sometime its own particular beginning, but where or how that beginning took place is something that is not known and may probably never be known.

From its name and some of the technical terms used in the sport various writers have ascribed its origin to The Netherlands. It has been asserted that Flemish merchants introduced it into Scotland in the latter part of the 15th century, but no Continental literature makes any reference to it.

Opponents of the Continental theory declare that there is good reason to believe that curling originated in Scotland, probably in the south-western district of the country, which has always been its stronghold. However, regardless of what land it may owe birth, the credit for its development and popularity rest solely at

the door of the Scot, and the game is as much a part of Caledonia as the heather and the pipes.

The Royal Caledonian Curling Club owed its inception to an advertisement in the North British advertiser of May 26, 1838. This notice stated that a meeting would be held in the Waterloo Hotel Edinburgh on the June 20 following. The curious thing about this advertisement was that it was inserted anonymously and no one has since found out who was responsible for it. Whoever it was, he did a great thing for curling, for before the Grand Club, the rules of the game were in confusion and progress was impossible under the conditions then prevailing.

The meeting was held, about a dozen gentlemen being present, and Dr. John Cairnie of Curling Hall, Largs, was elected chairman. A second and much larger meeting was held on July 25th, and the "Grand Caledonian Club" was instituted with Dr. Cairnie as its first president. In August, 1843, Queen Victoria granted permission for the use of the name "Royal Grand Caledonian Curling Club". The "Grand" was subsequently dropped as being superfluous and since that time the Club has had its present title.

## ODDITIES In The News

Abbey Wood, England, one of Kent's flood-stricken areas took on a bright touch when a shoal of brightly-colored tropical fish darted along the flooded streets. They had been washed out of an aquarium.

Mrs. Mary Goodman, Northampton, England, was looking forward to celebrating her 100th birthday this year. But old business papers turned up to show that she was 100 years old in 1951.

The first C.P.R. passenger train from Montreal to Vancouver made the 2,906-mile journey in 1886, taking 140 hours.

Ten years ago some thief took from Al Pickard, prominent hockey executive, a wristwatch Regina Aces had presented to him when he was their coach in 1929-30. The keepsake was returned to him by a girl who found it on a dance floor.

John Piercy, new railway yardmaster at Annesley, England, spent weeks tidying up his new home and garden next to the railway tracks. Then part of a train was derailed, crashed through a fence and deposited 50 tons of coal in the garden.

The sweet potato plant belongs to the same family as the morning glory.  
3027

## Rode Coast To Coast On Horse

VICTORIA. — Bill Martsch, 20, of Kitchener rode into Victoria recently on his trusty sorrel, Rocky, completing a coast-to-coast jaunt on horse-back.

"I've covered a few miles," was his modest comment.

Bill, who was born in Eaton, Sask., worked until last spring cutting alfalfa for a Kitchener dehydrating plant.

He quit his job when a doctor told him he had a weak heart and was swallowing too much dust. The doctor said he should get plenty of fresh air.

Last May Bill saddled up eight-year-old Rocky and went east. He reached the Maritimes in June and stayed there until August. Then he left Prince Edward Island for Victoria.

Horse and rider have logged an estimated 6,000 miles. They average 32 miles a day during the summer and 27 miles during the winter.

A full-fledged hurricane will generate more energy than 1,000 atom bombs exploded simultaneously.

## MAN LOST NOW

VANCOUVER.—Police said that a wallet containing \$850 lost by J. D. Robertson of Vancouver in 1950, had been found behind a wash basin in a downtown building. There was no trace, however, of Robertson.

## WRAPPED FOR EXPORT

LONDON.—Showpiece at the national packaging exhibition held here recently was an Essex firm's machine for wrapping racing cars. The device covers each car in a plastic envelope before crating it for export.

**MAGIC** makes baking  
fine-textured, delicious!

### CINNAMON SANDWICH BISCUITS

Mix and sift once, then sift into a bowl, 2 c. once-sifted pastry flour (or 1½ c. once-sifted hard-wheat flour), 3 tps. Magic Baking Powder, ¼ tsp. salt and ¼ c. fine granulated sugar. Cut in finely 4 tbs. chilled shortening. Combine 1 well-beaten egg, ½ c. milk and ½ tsp. vanilla. Make a well in dry ingredients and add liquids; mix lightly with a fork, adding milk if necessary, to make a soft dough. Knead for 10 seconds on lightly-floured board and roll out to ¼" thickness; shape with floured 1½" cutter. Cream together 1½ tbs. soft butter or margarine, ¼ c. lightly-packed brown sugar, ½ tsp. grated orange rind and ½ tsp. ground cinnamon. Using only about half of the creamed mixture, place a small spoonful of the mixture on half of the cut-out rounds of dough; top with remaining rounds of dough and press around edges to seal. Spread biscuits with remaining creamed mixture and arrange, slightly apart, on greased cookie sheet. Bake in hot oven, 450°, about 12 minutes. Serve warm. Yield—16 biscuits.

## IN THE LEGISLATURE

By H. G. HAMMELL, M. L. A.

The past week has seen the introduction for first and second reading about 55 bills, but as these are not discussed until in The Committee of The Whole, I shall leave these for a future date.

The main debates this week have been on resolutions. First was a resolution of somewhat different policy by the C.C.F. asking the Government to consider some policy of providing compensation for those injured or killed by auto accidents. In the past the resolution introduced by the C.C.F. has been on auto insurance, but as Saskatchewan rates have doubled and losses of over one million dollars have been incurred, this was omitted. The Government of Alberta have under consideration some policy covering accidents and deaths by motor vehicles, so the resolution was turned down.

Second was a resolution by the

Liberals on gas export. As usual they fought the idea of gas export. This was handled very well by the Premier, who now is also Minister of Mines and Minerals, when he made clear the following statements:—

"That Alberta now has over 300 potential gas wells, costing over 18 million dollars capped due to lack of a market. This is also affecting the further development of drilling for oil."

He further explained that until a grid system of collecting gas is built a lot of towns and villages will be deprived of gas due to the cost of lines to separate outlets.

It is now believed that if such a grid line were built there is sufficient potential wells in the Didsbury Constituency to supply the Towns and Villages in this district.

In this debate it was told that before gas was exported, many products such as Propane, Sulphur, Butane, etc. must be extracted, leaving Methane or heating gas only for export. Thus the farmers of Alberta would have Propane for heating and the Petro Chemical industries, which already have spent or propose to spend 10 million dollars in Al-

berta, can use the by-products.

Thus the Petro Chemical Industries will build in Alberta and not at the other end of the lines as some fear.

It is, as explained by the Premier, the intention of the Government to encourage export of gas, taking into consideration the requirements and needs of our own people first, and the development of industry second.

It is interesting to learn that the Government of Alberta is only able to regulate or control the export of gas within its own borders, and after that it is the responsibility of the Federal Government, thus the reason for gas exporting companies applying to both the Alberta and Federal Governments for separate bills.

I wish to thank all those who wrote me in regard to the Liquor Question. I expect this bill to be brought in next week and it will be reported next week. So far, those members who spoke in the Throne Debate, expressed their opposition to any further outlets for Liquor, but further on this later.

Alberta Premier E. C. Manning Friday night brought down an all time record budget of \$174,083.

## Beiseker Play

For the second successive year the "C. Y. O. Players" of Beiseker will present for the general public a full-length play. Last year many from Beiseker district and neighboring communities attended and enjoyed the presentation of one of the classics in Moliere's "The Miser". This year it will be something entirely different in "Nine Girls"; a play in a prologue and two acts. Not only is it different because of an all-girl cast but also because when not concerned with murders it is a frolicsome comedy, a thriller with even an aspiring Lady MacBeth. The audience is let in early on the high crime suspect and is kept a few paces ahead of the criminal, happy with a guilty secret. "Nine Girls" demonstrates again that the female of the species is more deadly than the male.....nine times more! The play moves at such an accelerated pace there is no room for gloom to blot out the excitement of two thrilling acts. nical arrangements. It is planned to have two public performances on the evenings of Wednesday and Thursday and Thursday, March 25th and 26th in the Beiseker Memorial Hall. Curtain time is promptly at 8:30 p.m.

130 for the 1953-54 fiscal year, an increase of \$50,506,160 over the current year.

The Provincial Treasurer said the budget contained no new financial burdens for Alberta taxpayers because of the province's oil-rich economy profiting from the tremendous petroleum boom.

The budget contained provisions for \$35,714,790 in loans to financially distressed municipalities and other groups, more than balanced by estimated revenue from the oil industry during the coming year of \$46,432,000.

Manning budgeted for a surplus of \$410,030.

Besides the \$25,000,000 revolving fund to supply loans to municipalities, the government planned to spend a record \$35,952,200 on a vast highways construction program and greatly increased assistance to all government departments.

That Spirit is the real and eternal, and matter the unreal and temporal, is clearly set forth in the Lesson-Sermon entitled "Substance" at Christian Science churches on Sunday. It contains this affirmation by the Apostle Paul in his epistle to the Romans: "For the invisible things of him from the creation of the world are clearly seen, being understood by the things that are made even his eternal power and Godhead" (1:20) and this statement in "Science and Health with Key to the Scriptures" by Mary Baker Eddy: "The substance, life intelligence, truth, and love, which constitute deity, are reflected by His creation; and when we subordinate the false testimony of the corporeal senses to the facts of science, we shall see this true likeness and reflection everywhere." (516: 4-8)

Alex R. McTavish, R.O. Graduate Optometrist will visit Hotel Acme on Mon. morning, March 16th and Drug Store, Carbon on Mon. afternoon, March 16th. Dependable eyesight service.

## Now I HAVE A FUTURE UNLIMITED!

"My name is Phyllis. I am six years old. I have a club foot. For a long time my Mommy and Daddy thought I would always be very lame. Soon I will be able to walk without my crutches. Mommy says I am a very lucky girl. . . I think so too!"

Phyllis is only one of hundreds of children who have overcome their physical handicaps through the help of the Alberta Red Cross Crippled Children's Hospital. The new hospital, Canada's largest orthopedic institution, was built by contributions from Albertans with the assistance of provincial and federal grants. It is a monument to the people of this province who wish to give every opportunity to the crippled child . . . to all of us who can open the doors to those with a limited future — to a future unlimited.

Alberta Red Cross Crippled  
Children's Hospital, Calgary, Alberta.

## YOUR HELP TODAY WILL HELP THEM TOMORROW

Though the Alberta Red Cross Crippled Children's Hospital is only one of numerous Canadian Red Cross projects it is Alberta's most important consideration. During the peak of the 1952 polio epidemic, 149 patients were hospitalized. These were in addition to 142 patients who had been admitted to the hospital during the preceding ten months. What does it take to meet such an emergency and administer to our handicapped children? It takes a highly trained and skilled staff of doctors, nurses, physiotherapists, laboratory technicians, X-ray technicians, administrative and

maintenance personnel . . . it takes provincial government financial assistance as well as all the support through contributions that the people of Alberta can possibly give. Red Cross work in Alberta is estimated at an annual cost of over \$600,000. Of this total \$321,940 will be required to carry on the work of Alberta's Red Cross Crippled Children's Hospital. After provincial grants have been deducted an estimated amount of \$123,965 is still needed. When the Red Cross worker asks for your contribution . . . give as much as you can.

CANADIAN RED CROSS SOCIETY  
CAMPAIGN MARCH 2-31, 1953.

ALBERTA OBJECTIVE \$459,900.00  
National Objective \$5,310,600.00

## YOUR DOLLARS WILL HELP HERE . . .

- In meeting administrative expenses for nurses, physiotherapists, X-ray and laboratory technicians, nurses' aides, school teachers, domestic and maintenance personnel.
- The maintenance of the hospital brace shop where hundreds of braces and harnesses for crippled limbs are made.
- In the maintenance of an adequate school and library in the hospital for the education of young minds so that patients may acquire a sound education as well as overcome their physical handicaps.
- In support of the hospital orthopedic "gym", specially equipped for the correction of remedial disabilities.
- To treat cases and restore the health of patients suffering from: Orthopedic conditions, including osteomyelitis, osteochondritis, congenital anomalies — Club feet, club hands, hip dislocations and numerous other deformities. Arthrogryposis conditions, tuberculosis of the bones, traumatic conditions (amputations, etc.), malunited fractures, poliomyelitis, arthritis and numerous others.

GIVE GENEROUSLY... KEEP YOUR RED CROSS STRONG

Enjoy modern roomettes, compartments, bedrooms, drawing rooms, standard or tourist sections or air-conditioned coaches with individual reclining chairs.

See your local Canadian Pacific Agent  
for full details.

Canadian Pacific

## THRILLS of the ROARIN' GAME

### Play It Safe!

When you consider everything connected with a game of curling, including the implements, it's easily seen that the possibility for a mishap is actually pretty ripe. A bit of thoughtfulness, here and there during the heat of battle will do it.

Some of the most common causes of broken bones and painful bruises can easily be avoided. For instance, if possible, always stop that runner that zooms through the house before it hits the hack or back boards. Keep all stones that are out of play well back to the end of the ice so no one can back into them.

If you're not so spry, don't try to sweep that fast one. Beware of the icy sideboards—they may look innocent, but a couple of coats of "pebble" and they're like that gun that wasn't loaded. When the game winds up at the far end—don't throw the stones back even if you are mad—

## ITCH RELIEVED IN A JIFFY

Very first use of soothing, cooling, liquid D.D.D. Prescription positively relieves raw red itch—caused by eczema, rashes, scalp irritation, chafing—other itch troubles. Greaseless, stainless. 43c trial bottle must satisfy or money back. Ask your druggist for D.D.D. PRESCRIPTION.

## How To Save Money and Get Fast Cough Relief

Here's an old, tested, home mixture your mother knew... still a most dependable remedy for distressing coughs. Fast and effective, children like its pleasant taste.

Make a syrup by stirring two cups of sugar into one cup of water until dissolved... no cooking needed (or you can use maple syrup or honey instead). Now pour 2½ ounces of PINEX CONCENTRATE into a 16 ounce bottle, and add the syrup you've made. You'll have 16 ounces of fast acting, pleasant tasting cough medicine, more than you could buy for four times the money, with effective relief for the whole family.

Pinex—a special compound of proven medicinal ingredients—must help you, or money refunded.

PINEX IS EASY TO MIX—  
FAST ACTING—EFFECTIVE

NR-522

## Patterns

All-Time Favorite

7048

by Alice Brooks

Grandma called it "Wonder of the World"; you'll agree it is, for it's only a two-patch quilt. Simple to piece and so effective you will love this design!

Two patch quilt in two materials! Pattern 7048; directions, pattern pieces.

To obtain this pattern send twenty-five cents in coins (stamps cannot be accepted) to:

Household Arts Department,  
Prairie Publishers Limited,  
60 Front Street W., Toronto.

Be sure to write plainly your Name, Address and Pattern Number.

push 'em. Wet ice is murderous footing, and an oldster should stay clear of it—while a partly swacked gent should absolutely be barred from setting foot on it.

Keep this in mind, that the last rock of the end can be worth more than all the others put together!

## Six Tips On Cold Weather Driving

The following six tips on cold weather driving are offered by the Committee on Winter Driving Hazards of the National Safety Council.

1. Get the feel of the road before you start out—do this by trying your brakes while driving slowly and away from traffic.

2. Adjust your speed to road conditions. Slow down on wet, snowy and icy roads so you can stop when necessary.

3. Use tire chains on ice and snow—they cut down braking distances as much as 40 to 50 per cent. Chains are not a cure-all for winter accidents, but they will help the careful driver.

4. Keep your windshields and windows clear of ice and snow, fog and frost. Be sure your headlights, windshield wipers and defrosters are in good working order. You have to see danger to avoid it.

5. When you have to stop pump your brakes—jamming them all the way to the floor may lock them and throw your vehicle into a skid.

6. Follow other vehicles at a safe distance—remember that it takes from three to twelve times as long to stop on snow and ice as it does on dry concrete.

An added warning is given to those of you who have your vehicles in garages: Do not start your car without first opening the garage doors to allow fumes to escape.

Remember the danger of Carbon Monoxide poisoning is greatest at the coldest times of the year.

## STRANGE IS CORRECT

SANDRINGHAM, England—Guests at Sandringham House are hearing strange music at times. Young Prince Charles is learning to play a miniature set of bagpipes he received as a Christmas present. 3026

## Mrs. Clyde Scott Puts on Blue Bonnet —Says it's Best!

Mrs. Clyde Scott invites you to compare BLUE BONNET Margarine with any spread at any price! ## Check Stored Grain For Insect Damage

Numerous reports of insect damage in farm-stored grain reveal that a potentially dangerous situation exists, requiring thorough examination of such grain by farmers.

The Saskatchewan Director of the Agriculture Department's plant industry branch, R. E. McKenzie, said that while early reports of damage and heating showed the presence of the rusty grain beetle, investigation of more recent reports resulted in the finding of a large number of other insects. Of these the common grain mite and the rusty grain beetle are the principal ones which damage the kernel, but the other insects which merely live in the grain can also cause heating and spoiling.

Mr. McKenzie stated that all grain in storage should be carefully examined for the presence of insects and evidence of heating, with bins and piles sampled from top to bottom.

Satisfactory control of insects can usually be obtained by moving the grain with an auger. Exposure to air on a cold day will kill many of the insects and reduce the temperature of the grain. The Director especially recommended running the grain over a fine screen when augering it out of a pile or bin. This, he said, will sift out many of the insects.

It is thought that the unusually mild winter weather may be responsible for the heavy build-up of grain insects. Very small pockets of damp grain in bins or piles that are other-

wise dry can start an infestation. These pockets may develop in many ways, through leaks in granary roofs, holes in the floor, and by condensation of moisture on top of the bin in tight granaries without ventilation. In open bins melting of snow may cause dampness, and in temporary bins between granaries, water dripping from the eaves may be enough to cause damp pockets. All these situations may be sufficient to start an infestation with resulting serious losses.

## GIFT MAY BRING TRADE

VANCOUVER.—A new market for British Columbia's red and yellow cedar may be opened by a gift to Britain from the B.C. Lumber Manufacturers Association. A cargo of cedar recently was delivered in London to be turned into sample hutments for armed services personnel.

A person's ear is more sensitive to interruptions in sound than the eye to a flicker of light.

## Here's Real Relief for ARTHRITIC RHEUMATIC PAINS—STIFFNESS

W. K. Buckley has discovered how to combine 9 powerful, pain-dispelling medicaments in a snow-white cream that vanishes: It penetrates to where the pain is—brings relief from stabbing tortures—faster and longer than any rub you have ever used. Ask for BUCKLEY'S Stainless WHITE RUB—only 50¢.

FREE... if you are at all skeptical of its amazing merit send a 4¢ stamp for trial jar to Department "W", W. K. Buckley Limited, 559 College St., Toronto, Ontario.

## Trust MAGIC for sure-fire baking success!

### WALNUT BUTTERMILK LOAF

Mix and sift twice, then sift into a bowl, 2½ c. once-sifted pastry flour (or 2½ c. once-sifted hard-wheat flour), 2 tps. Magic Baking Powder, ½ tsp. baking soda, 1½ tps. salt, ½ tsp. ground mace. Mix in ¾ c. lightly-packed brown sugar, ½ c. rolled oats and 1 c. broken walnuts. Combine 1 well-beaten egg, 1 c. buttermilk, 2 tps. grated orange rind, 1 tsp. vanilla and 5 tbs. shortening, melted. Make a well in dry ingredients and add liquids; mix lightly. Turn into a loaf pan (4½" x 8½") which has been greased and lined with greased paper. Bake in a rather slow oven, 325°, about 1 hour. Serve cold, thinly sliced and lightly buttered.

PEGGY

• • • • •

There was a Spanish army, under the Prince of Parma, in the Netherlands, sent there to subdue the rebellious Dutch. Philip assembled a fleet of 130 vessels, manned by 7,000 sailors and carrying 17,000 soldiers. They were to voyage up the English Channel and form a junction with Parma.

The Irish South's Spades was jumped to Four by North on the assumption that South probably had five trumps. West led ♠ K and shifted to ♠ 4, taken with ♠ A. South then made the good play of ♠ J to retain control, but East went in with ♠ K, cashed ♠ Q and led a Heart to force the Dummy. South was held to nine tricks, although the contract could still have been made.

Only half of the ships survived the fiercest ordeal of fire storm ever visited upon a group of courageous but ill-led men.

It is extremely important to men in certain jobs that they know whether a young woman is over 18. Many young women in order to gain entrance to night clubs or to be served drinks will claim to be over 18. How can a man tell whether a female is over 18? In many cases it is practically impossible. Yet according to the legal view, "the burden of knowing a woman's age is placed upon the man."

There may be as many as 100,000 worker bees in a big hive.

Saskatchewan Government Airways logged a record 7,977 hours of northern flying in the 12 months ended last Oct. 31. Air miles flown reached 762,000, bringing the total to more than 3,262,000 miles, since the service started in 1947.

A steam launch with no one aboard was successfully manoeuvred in English waters by "wireless telegraphy" in 1902.

**POLICE ROADBLOCK KILLS DRIVER OF SPEEDING CAR**—A heavy steel-plated tractor trailer, set up as a roadblock on the Queen Elizabeth Way between Hamilton and Toronto, brought death to two persons. Police commandeered the 22-ton trailer when word was radioed to them of a 100-m.p.h. speeder travelling from Hamilton. Policemen standing beside the truck with a flashlight to signal the car say the driver did not brake, but hit the roadblock at full speed. The car, as shown here, was a complete wreck.—Central Press Canadian.

**MYSTERIOUS EXPLOSIONS WRECK U.S. SHIP OFF JAPAN**—The U.S. steamship *President Pierce* is shown as she limped into Yokohama harbor, crippled by four mysterious explosions which set the vessel ablaze while still 135 miles off Japan. The freighter and passenger ship developed a 14-degree list after 800 tons of water had been pumped into the hatches to quell the fire that burned for 24 hours. Sixty-two persons were aboard.—Central Press Canadian.

**CANADA'S POSTMASTER GENERAL**, Hon. Alcide Cote, weighs a package at a new Montreal Postal Station. The gesture symbolized the official opening of the station. With Mr. Cote are W. E. Laurierault, (left), pro-mayor, and R. Boileau, Montreal Postmaster.

**NORWAY PRINCESS TO WED COMMONER**—King Haakon VII of Norway has announced the engagement of his granddaughter, Princess Ragnhild, 22, (above), to a wartime resistance leader who was once her bodyguard. The bridegroom, a commoner, is Capt. Erling Lorentzen, 30, who attended school in the U.S. The Princess will lose her titles when she weds in May.

**CHRISTINE COMES HOME**—Photographers surround Christine Jorgensen, the man who became a woman following medical treatment in Denmark, as she leaves a plane at New York's International Airport recently. Dressed in a loose-fitting nutria coat and carrying a mink cape, the 26-year-old Bronx girl who once served as a private in the United States Army, told newsmen: "I'm very happy to be home and will be just as nice to people as they are to me."

**IT'S ALL A MATTER OF CONCENTRATION**—In Rome, Italy, Luigi D'orian, (above), shows how he concentrates his power on a pretty ailing patient. D'orian and Achille D'Angelo, Italy's top "magi", or better-known perhaps as sorcerers, were brought to court by the Italian Medical association for what the association alleged to be abusive medical practices. The well-known "magi" claim they can heal by merely concentrating their eyes on the ailing body and waving their hands over the afflicted part. They are not taking the accusations without a protest and declare they can prove that what they do is no hocus pocus and not connected with medicine.

**GENERALISSIMO CHIANG KAI-SHEK** is shown above in one of his most recent public appearances in Formosa. He said he would not ask for manpower and called on the free world to support the denuclearization of Formosa.

**B.C. STUDENT TO SEE CORONATION ON BEHALF OF JUNIOR RED CROSS**—Among thousands of Canadians attending coronation of Queen Elizabeth on June 2nd in London will be 16-year-old Virginia Kalmakoff, seen here holding her pet cat. A high school student, at New Westminster, B.C., Virginia was chosen, along with another student from same school, to represent Canadian Junior Red Cross at famous event.

**FIRST T-33 FOR R.C.A.F.**—Defense Minister Brooke Claxton looks over the T-33 jet trainer he accepted from Canadair Ltd., in Montreal. The trainer, now known as the "Shooting Star", is in the 600 m.p.h. speed level, and is designed as a go-between in training pilots before they handle the controls of a Sabre jet.

# Garden Notes

For Amateur Gardeners

## AN INEXPENSIVE HOBBY

Like bird watching, hiking or camping, gardening is an inexpensive hobby. Golfing, yachting, or even picture taking requires a lot of costly equipment and they take one a long piece from home. But gardening is just as healthy as any of these other recreations and the initial cost and the upkeep amount to only a few dollars. Moreover when vegetable growing is included there is a nice dividend in the freshest kind of food, right at the kitchen door.

## EQUIPMENT

One can do wonders with a few cents worth of seed, a spade and a rake. For all the technical information necessary the directions on the seed packet and in the seed catalogue will suffice. These directions tell the gardener when to plant and how deep, and how big will grow the things he has planted so he can allow sufficient room.

Of course those are minimum requirements and for just a tiny plot. A few extras like a cultivator or two and a little more variety in the seeds and plants will increase the satisfaction and enjoyment. For extra and detailed information too, there are excellent gardening books and government bulletins available.

If one is really ambitious, one can expand almost indefinitely. There are literally hundreds of different flowers and vegetables at one's disposal, and more hundreds of perennials, shrubs and vines and trees. There are specialties like rock gardening, perennial borders, rose gardens and garden pools. There are also power gadgets for cultivating, trimming, spraying, clipping, leaf gathering and such jobs for the person who is mechanically inclined or who has a really big piece of ground.

## BETTER THAN EVER

Not so many years ago one could not grow corn, squash, roses, fruit and dozens of other plants except in the very warmest parts of Canada. These things were not hardy enough, or they took too long to mature in our relatively short season and the early frosts struck them down.

Now over the greater part of the country the gardener has hundreds of flowers and vegetables from which to choose. And not only have we been given earlier maturing and hardier varieties, but also better quality, or more vivid or striking colors.

In the old days, too, the garden was sort of a feast or famine proposition, a few days when the peas, corn or beans were ready, a few days of vivid bloom, then nothing else. Today with improved varieties and by using several sorts with different maturing periods or flowering dates one can have a wonderful and producing garden from a few days after frost in the spring until far into the fall.

In ordering seeds and plants for the coming season one should remember these changes and improvements and by selecting carefully insure more satisfaction and a fuller return. The Englishman with his flower garden and the Frenchman with his plot of vegetables expects results almost 365 days in the year. Our climate is a bit too severe in the winter for that sort of continuous production, but even in the cooler parts of the country there should be six months use and pleasure at least. From the tiny snowdrops and crocuses, which bloom right after the snow, until the chrysanthemums in October and November, there should be almost continuous bloom. And in the vegetable line by starting early and storing the surplus in the fall, there need be hardly a week without something from one's own garden.

## The Break-Away Pass

Now that speed is being stressed more and more every day in hockey a team that has developed the ability to get the puck up the ice quickly has a tremendous advantage. Here is a drill to help your team develop this skill. Two players start on the goal line. A third player stands on the far blue line. The puck carrier skates slowly up the ice. The second man breaks quickly up the side and takes a pass as he reaches the center line from the first man who has reached the blue line. The second man then breaks for the far blue line, and just as he reaches it the third man breaks in toward the goal and takes the forward pass from the second man and shoots. This drill can be done with groups of three going up the ice one after another. Have the players change positions. This is a very effective drill and if practised hard will pay big dividends.

## Knee Action in Skiing

The most important part of your skiing is your knee action. The average skier makes the serious mistake of keeping his legs rigid, especially at the knees. If you do not have a correct knee action you will never become a really good skier. Unless your knees are always flexible, feel springy and move easily when you are running over rough or corrugated ground, you will not get the best results. You must press your knees forward as far as you can and as close to your skis as possible—try to decrease the distance between your shins and skis as much as possible. Keep your heels on your skis and don't squat—just bend those knees forward, keeping your upper body relaxed but practically erect. These things are especially important for you to remember when skiing downhill at high speeds. A final point to keep in mind is that flexible knees will also help you avoid falls and possible injury.

## The Athlete's Snack

The athlete should include in his snack such simple foods as fresh fruits, especially oranges, wholewheat bread and honey, cheese or a good whole grain cereal. Sundried figs, raisins and apricots are also good snack foods. These foods are packed full of healthy energy fuel. For your

snack beverages have milk, fruit or vegetable juices, and Ovaltine. Stick to a proper diet and make sure you eat wholesome foods when having a snack as well as during your regular meals, this really pays off.

## AVAILABLE NOW

Yes, available now to all Sports College members is a new series of bulletins. These bulletins cover the latest information on diet fundamentals, techniques of fatigue recovery, pre-competition relaxation drills and others of interest to every member of the family. The price of these bulletins is 25c each to Sports College members. To join Sports College all you have to do is send a note to: Sports College, Box 99, Toronto 1, Ontario. Do it today!

An automobile consumes 60 per cent. more gasoline at 65 miles an hour than at 25 miles an hour.

## What Canada Is Doing To Help Flood Victims

Two hundred and fifty cases of Canadian Red Cross clothing, bedding and flood relief equipment, stockpiled in Geneva at the League of Red Cross Societies warehouse, were rushed to the Netherlands. Subsequent shipments from Canadian Red Cross via Trans-Canada Airlines, KLM Royal Dutch Airlines, B.O.A.C., Air-France and R.C.A.F. air transport: 3,000 army blankets, 1,000 mattresses, 5,000 pillows, 5,000 oilskins, 50 outboard motors, 3,000 thermos jugs, 82 cases clothing, 2,820 bed sheets, 5,335 pillow cases, 12,000 pairs hip waders, 4,603 pairs heavy work boots, 3,300 pairs men's, women's and children's shoes, 150 bush coats, 250 dozen pairs men's socks.

All provincial divisions of the Canadian Red Cross are sending priority shipments via TCA directly to Dorval Airport (Montreal) where they are consolidated and sent by first available aircraft to the Red Cross Societies of Great Britain, the Netherlands and Belgium. Supplies of second priority and rehabilitation requirements are despatched by express or freight to seaboard and sent by fast ship to the needy areas.

The Canadian National European Flood Relief Committee has been set up under the chairmanship of Rt. Hon. Vincent Massey, Governor-General of Canada, following a suggestion made by Prime Minister Louis St. Laurent in the House of Commons on February 3. The Committee includes the Prime Minister, leaders of all political parties, the 10 provincial premiers, the chief justice of Canada, leaders of labor, agriculture and women's organizations and a group of outstanding, representative citizens from all parts of Canada.

An immediate, intensive campaign to raise a generous fund with which to provide a continuing flow of co-ordinated practical aid to the stricken areas.

Donations will be accepted at any branch of any Canadian chartered bank. An official receipt will be given which can be used as evidence of a charitable donation for income tax purposes. The Canadian Red Cross has agreed to serve as the administrative arm of the national committee and to undertake all purchasing and transportation of relief supplies and their distribution through the Red Cross Societies of the stricken countries.

## Weekly Tip

### KEEPING PAINT

The paint that is left unused in a can may be kept in perfect condition if some paraffin is poured over it. This will prevent its hardening.

## EXCELLENT WAY TO CELEBRATE BIRTHDAY

HONG KONG.—Aw Boon Haw, the Chinese tiger balm king, celebrated his 70th birthday by presenting more than 100,000 Hong Kong dollars (about \$16,999) in cash and gifts to \$5,000 elderly men and women. The recipients lined up at a local football field to get cash, a bar of soap, a package of cigarettes, a bag of fruit and cake and a tin of Tiger Balm—the patent medicine which made Aw Boon Haw a millionaire.

Lions do so well in captivity that they usually outlive their normal span of life. 3027

## EXPECTS U.K. CAR EXPORT INCREASE

LONDON.—Sir William Rootes, British automobile maker predicted that Britain will sell 25 per cent. more cars to the U.S. this year than last, when the figure was about 30,000.

Hebrew is the only one of the ancient Semitic languages that has survived as a spoken language.

## BUSIEST IN WORLD

The Soo Canals at Sault Ste. Marie carry more traffic than the Panama and Suez Canals put together. Great Lakes shipping makes this artery, and the Detroit and St. Clair Rivers between Lake Huron and Lake Erie, the busiest waterways on earth.

Snakes have no proper eyelids which they can close, so they sleep with their eyes open.

## Marooned Week In Sub-Arctic Pilot Did Not Dare To Sleep

CHURCHILL, Man.—A story of luck and grit in the bitter cold of the long sub-Arctic night was told on his return here by bush pilot Gunnar Laurell who was marooned with his plane a week in the barren lands, 1,000 miles north of Winnipeg. An R.C.A.F. search plane found him.

Flying freight from Ferguson Lake to Baker Lake, 375 miles northwest of here, on December 13, Laurell said the weather closed in and he could see no landmarks. His radar blacked out, and when he dropped through the clouds Baker Lake was not where he expected. He continued on course but later figured a strong tail wind had driven him past his destination.

"When the reserve of gas dropped to 45 minutes, I changed course to southeast," said Laurell. Still no luck. When only 20 minutes' gas remained I decided to land.

"Visibility was poor. I had to fly 25 to 50 feet above the ground. At sight of an open spot I cut the gas and landed. In spite of the 13th, I was lucky. This was the only lake

within a radius of 30 miles."

The radio blackout persisted and he could not raise Baker Lake.

"It was 30 below zero and the wind was so strong it threatened to overturn the plane many times."

He was so short of gasoline he could use it only to melt snow. There are no trees or shrubs in the desolate barrens.

"I cut through the ice to get water but the lake was frozen to the bottom. Darkness lasted 20 hours out of the 24. After the first night I lit a candle for a few minutes at a time as I knew I might be on the barrens for months."

"Each time I lit a candle I melted a cup of snow as well as getting light. Nothing to read. No one to speak to. Yet I did not dare go to sleep once during the seven days and nights lest I freeze."

In his emergency kit only chocolates, raisins, sugar and a parcel of vitamins were of any use. The remainder was frozen solid, and Laurell said he dared not allow himself enough heat to thaw it. He usually smokes a package of cigarettes a day, but had none.

Laurell did not expect planes to search for him. He thought it would be considered certain he had crashed. Falling and blowing snow would make location of the wreck impossible until after spring thaw. He intended to await milder weather then use his compass to go south to Baker Lake and follow the shore line to the settlement. When he heard the search plane Laurell said he was astounded.

"I have no words to express my emotion—possibly the strongest was thankfulness to the R.C.A.F."

First reports indicated Laurell built an igloo to survive, but he said on his return he is adding a snow knife to his equipment so that he can build an igloo if he ever again is forced down. He also aims to put smoke bombs and a large sheet of red cloth in his plane to help searchers spot his plane.

## Heating Cable Sets For Hotbeds

Where electric power is available, heating-cable sets are a convenient source of heat for the hotbed. How these sets are arranged in the bed is described in the Gardener's Handbook, prepared by the Department of Agriculture, Ottawa.

One heating-cable set (60-foot length) will heat 36 square feet of soil, or the equivalent of one two-sash hotbed. Larger hotbeds will require more than one set, and for every two heating-cable sets a thermostat is required. A different type of thermostat is needed for hotbeds using three heating-cable sets or more.

The thermostat for use with the two heating-cable sets is buried directly in the soil, that for the three heating-cable sets is mounted on the wall of the hotbed and only the sensitive bulb is inserted into the soil. It is preferable to have the cable enter the hotbed at one end or at the high side where the thermostat is usually placed. The arrangement of the cable in the hotbed will depend on the size of the area to be heated.

For hotbeds using heating-cable sets, make the usual excavation and provide good drainage. Lay the cable out in a bed of sand or fine soil. On top of this lay a ½-inch wire mesh screen to protect the cable from damage when the soil is being worked. Then put about 4 to 6 inches of planting soil in the bed.

Seeds may be planted in the soil or planted in flats and set directly on top of the cables in the hotbed, depending on the type of plant being grown and the amount of handling, such as thinning and replanting, required. Electrically heated hotbeds require more water than manure beds. Keep the soil moist, but not wet, down to the cables.

## Smile Of The Week

Dear Dad: Gue\$\$ what I need most of. That's right. Send it along. Best wishes.

Your son, Ru\$\$.

Dear Ru\$\$: Nothing ever happens here. We know you like your school. Write us aNother letter. Jim was asking about you at NOon. NOW we must say goodbye.

As ever, Dad.

**MONTY PLANS TRIP TO CANADA TO SEE TRAINING CENTRES**  
—Field Marshal Montgomery of Alamein will pay a visit to Eastern Canada in April in conjunction with a visit to the United States. Main purpose of his trips to Ottawa, Kingston, Hamilton, Toronto, Quebec city and Montreal will be to see Canada's service training establishments and study facilities for officer training.—Central Press Canadian.

## Helpful Hints

Be sure never to close up the hole at the bottom of the flower pot, as the plant needs the air at its root to be healthy. Place a few cinders over the hole if you are afraid the dirt will fall through.

Ammonia will sometimes change the color of fabric on which it has been used for the removal of spots. When this is the case, the original color often can be restored by applying vinegar and water.

Tissue paper, slightly moistened, will remove dust easily. It is excellent for keeping a brass bed looking bright; also silver toilet articles, mirrors, and windows. It leaves no lint, and does not, of course, need to be washed when the work is done, but simply burned.

## Quick Canadian Quiz

1. How many miles from the 49th parallel to the shores of the Arctic Ocean?
2. In what province was wheat first grown in Canada?
3. What is the principal commodity exported to Canada from the United Kingdom?
4. A Canadian smoking one package of cigarettes a day would pay to Ottawa in tobacco tax over a year \$5, \$25, \$60, \$80?
5. What is the length of the Welland Ship Canal, between Lake Erie and Lake Ontario?

## :: APPETIZING RECIPES ::

Give them this Molasses Apple Pie for dessert. It has a novel flavor, and with a little molasses poured over the top, it tastes even better!

### Molasses Apple Pie

Pastry for 2-crust, 9-inch pie, 5 cups of sliced, tart cooking apples, ½ cup sugar, ½ tsp. salt and nutmeg, ¼ cup all-purpose flour, ¼ cup cooking molasses, 3 tbsps. butter, 6 tbsps. cooking molasses.

Put apples in 9-inch pie plate lined with unbaked pastry. Mix

sugar, salt, nutmeg and flour and sprinkle over apples. Dribble apples with the ¼ cup of molasses, dot with butter and cover with remaining pastry rolled ¼ inch thick. Seal, flute edge, cut gash in top crust and bake 40 minutes or until brown in a pre-heated 425 degrees F. oven for 40 minutes, or until apples are tender. Serve warm with about a tablespoon of molasses poured over the top.

## Grandmother Says Farm Women Not "Slaves"

MONTREAL.—A charming grandmother strongly debunks all who believe "women who live on farms are slaves and have no life of their own." She is Mrs. Gilbert Telford of Shawville, president of the Quebec Forum Association of Farmers. And Mrs. Telford is well qualified to talk about life on a farm. She has lived on one since she was 18—farming, looking after her home and raising six healthy youngsters. She has three grandchildren.

She said at the Mount Royal hotel that she wouldn't go back to permanent city life for anything. Living on a farm gave a happier, freer and much more family type of life.

"I know we have lived much more as a unit and gained much from life," she told me. "If you make your life together into one partnership, you can make farm life really wonderful. People who talk about a farmer's wife being a slave are right off the track."

Mrs. Telford usually begins her busy day round 6 a.m. She is adept at milking and most farm jobs. She didn't know anything about them when she first moved onto a farm, but soon learned.

"It is fun, and keeps one happy, healthy and active," she added. "Children brought up on farms are usually very healthy. 'There's no need to worry about schooling as we have buses to take them to consolidated schools. Their educations are not neglected.'"

Mrs. Telford said that she was at

first worried by the lack of a modern kitchen, but soon got used to it. Even now she pumps water.

"I haven't missed these up-to-date facilities, and believe with understanding and a will, one can make a happy home and find much more family spirit on a farm," she asserted. "I think my married children had a sound basis for married life on a farm."

Mrs. Telford said farming taught a woman to be much more independent and self-reliant. It had aspects of many careers wrapped into one.

"When you are on a farm you have a career, hobby, full time family life and entertainment," she insisted. "Life isn't so busy in the quieter winter months, but there is always something to do."

Mrs. Telford usually rises an hour later in the winter. She thinks getting up at 7 a.m. is "being spoilt and very lazy."

She advises all women who believe farm wives are slaves to "try it, and start living" as she insists she did.

## National Hockey League

### Data On Goalkeepers — G. McNeil Leads League With Nine Shutouts

National Hockey League goalkeepers have registered 35 shutouts after 158 games this season. This is two more than were recorded for the entire season a year ago . . . Gerry McNeil of Canadiens, who leads the League with nine shutouts, has a good chance to better Terry Sawchuk's mark of 12 goose-eggs, which the Detroit backstop turned in last season. The N.H.L. record is 22 shutouts in 44 games and was set by George Hainsworth of the Montreal Canadiens in 1928-29. No one is expected to ever break this record . . . Toronto's Harry Lumley had seven shutouts after 49 games this season. In 70 games with Chicago a year ago the best he could do was two. Lumley chalked up six of those shutouts during a nine-game stretch on Toronto ice. His first shutout of this season took place at Chicago.

While Harry Lumley only ranks fourth in the race for the Vezina Trophy among the loop's netminders, he is the only goalie to have played all his club's games and not allowed more than six goals to be scored on

him in one game . . . Terry Sawchuk, Detroit's All-Star goaltender who is seeking his second Vezina Trophy in as many years, has had nine goals scored on him in one game this season. He also had eight pucks get past him in another tilt this year . . . Gerry McNeil, who trails Sawchuk as the N.H.L. goalie with the second best goals-against record, has had seven goals tallied against him in one game this season . . . Jim Henry, third in the goals-against department, had one game this year when 10 pucks slipped past him . . . Chicago's Al Rollins has also had 10 goals scored against him in a tussle this season . . . Lorne Worsley, who has played goal for more than half of the Rangers games, had one nine goals-against evening, while Chuck Rayner, who goalied for 20 of the New York tilts, had six goals beat him for his highest goals-against game.

Terry Sawchuk has played 15 games for Detroit this season in which only one goal has beaten him. Jim Henry of Boston has played 15 one-goal against games. These goalies top the circuit in number of games played allowing only one goal, and coming closest to registering shutouts . . . Gerry McNeil has played the most games in allowing two goals to be scored against him. He has played 16 tilts in which a brace were counted against him. Al Rollins is next with 13 . . . When it comes to three-goals against per game, Al Rollins takes the lead. The slender Chicago twine-tender has had 12 games in which the opposition scored three times. Terry Sawchuk has had 11 games in which he let three pucks get by him, while Lumley and Henry have both played 10 games in which they've allowed three goals to be scored against them.

### 15th in a Row for Detroit

Detroit Red Wings will make their 15th straight appearance in the Stanley Cup playoffs this spring. The last time the Wings failed to make the playoffs was in 1937-38. No other N.H.L. team has made the Stanley Cup playoffs every year for the past 15. During that time the Motor City six has won three Stanley Cups. They carried off the coveted old piece of silverware in 1942-43, 1949-50 and 1951-52.

### Once Wrestled a Bear

Marcel Bonin, Detroit Red Wings' rookie winger, is probably the only hockey player who ever wrestled a bear. The 21-year-old Bonin once accepted a challenge to wrestle a 600-pound bear being shown by a travelling troupe. The bear's claws were clipped and his jaw muzzled. At the last minute Marcel wanted to back out of it, but finally went through with it and collected \$100 for his efforts. He is also quite a weight lifter and is one of the most solidly muscled players in the National Hockey League.

About 80 per cent. of the people of England and Wales are counted as urban population. 3027

## Canadian Fashion

(Women's Wear Bureau Photo)  
Bill Mintz of Trend fashioned this English worsted jersey in a combination of light and dark Oxford grey separated by a band of black velvet at the bodice. The hand embroidered motif is of English cut jet. The front of the straight skirt in this Canadian dress is slightly shirred, and the slash pockets are tabbed.

## Kitchen Meditations By JANE DALE

### OFF TO THE FARM FOR THE DAY

When ma says, "Put on your jeans this morning And your faded red plaid shirt." You bet I hunt out my oldest clothes That sun or rain can't hurt.

For I'll be off to the farm today!

If pa says, "Do you think you can manage To steer this tractor a round or two?" I'll climb on that seat quick as wink— I know what there is to do.

While we're at the farm today!

When ma says, "Son, did you have a good time today?" When at last I crawl into my small bed.

I imagine I hear the tractor again And feel the sun beating on my head. "Ma, I loved the farm today!"

### ANSWERS TO QUICK QUIZ

ANSWERS: 5. 25 miles. 3. Textiles. 1. 1,600 miles. 4. \$80 a year. 2. In Nova Scotia, at Annapolis in 1605.

(Material supplied by the editors of Quick Canadian Facts, the handbook of facts about Canada.)

## OUR COMPLETE SHORT STORY —

## JOHN RACEHORSE

John Was An Indian . . .  
So He Kept His Word and  
Waited . . .

By FRED CARTER

INDIANS are odd. Now, take John Racehorse. I never did figure out why he wouldn't come in. I'd been sheriff of Boonetown for 10 years and had been out on the reservation after wild bucks plenty of times. But this was different.

It was just an ordinary woman case. You know how some of these back country breeds are, sometimes forgetting whose wife belongs to whom. Don't know they're any worse than some whites, though. But John Racehorse was different. He'd married a young squaw and thought a lot of her. Of course, that didn't stop him from beating her up when she two-timed him for another buck. It was an old man he shot, a neighbor who tried to butt in and stop him. The old guy lived, but we didn't think he was goin' to. So I moseyed out.

John was gone, of course, and nobody would talk. So I came back to town. Went out two or three

times and learned that John was hidin' down in the bottom lands, beyond old Fort Hall. Like findin' a needle to hunt him down there, so I tried psychology. I took his old man to jail and told the folks I'd keep papa unless John gave himself up.

Of course it wasn't legal, only an old stealin' case he was on probation for, but it worked — a little too well . . .

I just sat in my office at the court house a couple of days and then John's brother came in. He stood there a minute, then grunted, "John say you come get 'em. He give himself up. Be on south side, Ferry Butte, six o'clock tonight." He turned and went out.

That was a queer one. Did he mean it or was he achin' to shoot me up? I figured he was on the level. Most of the Indians talk straighter than a white man, spite of what folks say.

I took a couple of deputies in the car, with long range rifles, and came in from the side so they could keep in range without my bein' in line with their guns.

It was almost sunset. You know how the sun shines through the dust out there, when the wind blows. It was kind of spooky, and every time I heard a rush of wind in the sage I jumped a foot. But I kept on goin'. A sheriff has to.

Of course, by this time, I knew the old man wasn't going to die after all, but I wanted to take John in to give him a good scare. You know, these Indians pay a lot of attention to family and tribe and all that. What they won't do for themselves, sometimes they'll do for the gang.

It took me a long time to get over to the south side of the butte. You remember it's long and kind of low. The sun was settin'. Big Butte, out on the desert, was peekin' up. There was still snow on top of the butte even though it was hot in the sage. Secin' all this made me almost forget what I was doin', but not quite. I watched the trail pretty sharp.

Finally I saw his pinto pony against the sage, but I couldn't see John. I wanted to turn back. He could have shot me and got away from there without half tryin'. But a sheriff has to get shot in the vest and not in the seat of his pants. Besides, sometimes a bluff will keep 'em from shootin'.

I'd walked maybe half way to John before I saw him. He'd taken the saddle off his pony and was sittin' on it, dressed up in a beaded suit. I never saw an Indian wear one of those things except at the fair. I couldn't see his gun, because it was still under the sage. And, sittin' down like that, Bill and Mac in the car couldn't see John. I doubted if they could even see the pony and I was below a hill from them.

There was a magpie in the sage about half way between us and when it spread its white tail feathers I

Funny and  
Otherwise

Some people are like owls—they get the reputation for being wise just by hooting at everything.

A young couple, on hearing of the arrival of a friend's fourth child, sent a play-pen as a gift. The "thank you note" left them somewhat astonished.

"Thank you so much for the pen," it said. "It is a perfect god-send. I sit in it every weekend and read, and the children can't get near me."

The cub reporter was told to cut his story to the bare facts. Following his orders he did so and produced this the next day:

"J. Smith looked up the elevator shaft to see if the car was on its way down. It was. Age 45."

A placid old lady who took life philosophically sat knitting in the drawing room. To her there came rushing her granddaughter. "Oh, Granny, Granny!" cried the girl, "Father's just fallen off the roof!"

"I know, my child," replied the old lady, without even raising her eyes. "I saw him pass the window."

"You should have no difficulty with your children. Just pretend they're someone else's — everyone knows how to bring up other people's children."

A bishop was accosted by a reveller, who said: "You think you know everything, but I'll tell you two things you don't know."

"Very likely," said the bishop.

"What are they?"

"I'm your cook's husband and I'm wearing your shirt."

"How is it that Joan attracts all the men?"

"I think it runs in the family. Her father's a steel magnate."

"Her fiancé's father is known as a very able judge."

"Zatso? It's more than you can say for her fiancé."

wanted to duck. I expected to hear a slug whine—or to feel it.

Then I heard his gun, but there wasn't a whistle. I dropped and hugged a brush no higher than my hat. After awhile, I pushed the hat up on my gun barrel, but there was no second shot. I peeped out to the side and I could see John lyin' on the ground, with his face up and one leg bent.

Then I got up and went to look at him. He had kept his word, and was there for me to bring in. His fancy beaded coat was drippin' red. Yes, the psychology worked all right . . . Too well. I never felt so much like a skunk in all my life. (Copyright Wheeler Newspaper Syndicate)

## Do You Know That . . .

The kangaroo can stand up and sit down at the same time.

Alberta Suffolk  
Sheep Shipped  
To England

DRUMHELLER, Alta. — For the first time in the history of the West, a shipment of purebred Suffolk sheep has been sent from Alberta to England.

The shipment, reversing the usual flow of purebred stock from the United Kingdom to Canada, will re-establish a flock wiped out last year by foot-and-mouth disease.

Two rams, five ewes and five shearling ewes were sent by P. J. Rock and son of Drumheller, Alta., to H. C. Hayward of Great Bromley, Essex, England, who once shipped prize Suffolks to the Rock firm.

"Bradley Quinton," a ram sold by Hayward, is credited with making the Rock farm one of North America's leading Suffolk breeding places. One of his offspring, a ram, sold for \$3,350.

## EFFICIENT WORKMEN

HUDSON BAY, Sask.—Despite the winter cold, dry ice was used to freeze the Red Deer river in northern Saskatchewan. Workmen used the chemical to thicken the ice beneath a bridge they were repairing when they found the fast current would not allow a firm ice footing.

A modern sugar beet factory can handle 6,000 tons of sugar beets daily. 3026

**BUCKLEY'S MIXTURE**

A SINGLE SIP TELLS WHY

*4 delicious treats*  
...make them from  
**One Basic Dough!**

It's amazingly simple with  
wonderful active dry yeast!

If you bake at home, find out the wonderful things you can do with Fleischmann's Fast Rising Dry Yeast! Serve fragrant rolls or fancy breads in variety from a single dough! Always get Fleischmann's Fast Rising Dry Yeast — it stays fresh in your cupboard, and acts fast in your dough!

## BASIC ROLL DOUGH

Scald

- 1 cup milk
- 5 tablespoons granulated sugar
- 2½ teaspoons salt
- 4 tablespoons shortening

Remove from heat and cool to lukewarm.

In the meantime, measure into a large bowl  
½ cup lukewarm water  
1 teaspoon granulated sugar  
and stir until sugar is dissolved. Sprinkle with contents of

- 1 envelope Fleischmann's Fast Rising Dry Yeast

Let stand 10 minutes, THEN stir well, stir in cooled milk mixture and

- ½ cup lukewarm water

Stir in

- 3 cups once-sifted bread flour
- and beat until smooth and elastic; work in
- 3 cups more (about) once-sifted bread flour

Turn out on lightly-floured board and knead dough lightly until smooth and elastic. Place in a greased bowl and grease top of dough. Cover and set dough in warm place, free from draught, and let rise until doubled in bulk. Turn out dough on lightly-floured board and knead lightly until smooth. Divide into 4 equal portions and finish as follows:

## 1. PARKER HOUSE ROLLS

Roll out one portion of dough on lightly-floured board to 14-inch thickness; cut into rounds with 3-inch cutter; brush with melted butter or margarine. Grease each round deeply with dull side of knife, a little to one side of center; fold larger half over smaller half and press along the fold. Place, just touching each other, on greased cookie sheet. Grease tops. Cover and let rise until doubled in bulk. Bake in a hot oven, 400°, about 12 minutes. Makes 6 rolls.

## 2. CLOVER LEAF ROLLS

Cut one portion of dough into 8 equal-sized pieces; cut each piece into 3 little pieces. Shape each little piece of dough into a ball and brush with melted butter or margarine; arrange 3 balls in each greased muffin pan. Cover and let rise until doubled in bulk. Bake in a hot oven, 400°, about 12 minutes. Makes 8 rolls.

## 3. FAN TANS

Roll out one portion of dough on lightly-floured board into a rectangle a scant 14-inch thick; loosen dough, cover and let rest 5 minutes. Brush dough with melted butter or margarine and cut into strips 1½ inches wide. Pin 7 strips one upon the other and cut into 1½-inch lengths. Place each piece, a cut side up, in a greased muffin pan; separate the slices a little at the top. Cover and let rise until doubled in bulk. Bake in a hot oven, 400°, about 12 minutes. Makes 8 rolls.

## 4. CRESCENT ROLLS

Roll out one portion of dough on lightly-floured board into a 14-inch round; brush with melted butter or margarine and cut into 12 pie-shaped wedges. Roll up each wedge of dough, beginning at the outside and rolling toward the point. Arrange, well apart, on greased cookie sheet; bend each roll into a crescent shape. Brush with melted butter or margarine and sprinkle with salt. Cover and let rise until doubled in bulk. Bake in a hot oven, 400°, about 12 minutes. Makes 12 rolls.

## THE TILLERS

### THIRD ARTICLE ON RABIES

By DR. E. E. BALLANTYNE  
Director Veterinary Services  
Alberta Dept. of Agriculture

The inclination to run off is very marked. They will eat thru wooden boxes or floors, tear chains apart or dig great distances through earth. As soon as they get their liberty they will run about aimlessly, covering a great deal of ground in a short space of time, and return in one or two days, showing every indication of great excitement or of having travelled long distances. When they return they are covered with dirt and utterly exhausted, and may be very quiet and well behaved for a short time. During this condition they bite any object that comes in their way. Soon the delirium increases and they run around in an insane way, attacking and biting anything that is within their reach, snarling or biting

all the time. If they are confined they bite at the bars and frequently break their teeth. If a stick is held toward them they attack it furiously. As a rule these cases do not tear or mutilate their own bodies, and if they do, they generally bite the region of the wound where they were formerly bitten or the toes of the hind legs. In the first stage of the disease it has often been noticed that they will lick and bite places where they have had wounds before. The dog snaps frequently, as if it was catching flies, and as a rule, will bite any animal that will come within its reach.

The biting and delirium are not constant, but appear after alternate periods of rest, followed by uncontrollable delirious attacks, especially if another dog should come near. These attacks may occur at intervals varying from one to four hours. The peculiar change in the voice is due to a paralysis of the vocal cords,

and the sound of the bark is prolonged into a higher vocal sound, so that it makes a combination between a howl and a bark, which has been described as a "howling" bark. This is harsh and shrill. Fear of water does not exist in the dog as in man, but toward the end of the second stage, due to paralysis of the throat muscles, there is great difficulty in swallowing. Very often an animal will pick up some indigestible object, attempt to swallow it, and not succeeding drop it from its mouth. Frequently the animal will lap out of his bowl, but it is seen if observed closely that he does not swallow any of it. On the other hand animals may cower and draw away from water that has been spilled on the floor of the cage. Vomiting sometimes occurs. There is great difficulty in passing manure which seems to produce considerable pain. There is very little alteration in breathing, but it may be slightly increased. The pulse is increased; the temperature also rises, but falls toward the end of the course of the disease.

The duration of the second stage, or excitement stage, which does not always present all of the characteristic symptoms of this condition, may last from three to four days.

(3) PARALYTIC STAGE—After the delirious spells have increased in intensity and the in-

tervals between them grow shorter, the paralytic, or last stage begins. The animals rapidly become thin; the eyes are staring, dull, and the eyeball is sunken into the skull. The conjunctiva is generally bloodshot the cheeks are sunken; the hair is erect; and symptoms of paralysis begin to appear. As a rule the first sign of this is a paralysis of the muscles that close or raise the lower jaw. This allows the saliva to run out of the corners of the mouth and form threads which hang down, and it is easily recognized that the tongue becomes lead-colored and hangs out of the mouth. Soon there is paralysis of the hind quarters. This begins with a staggering, unsteady gait, and finally total inability to use the back half of the body. Then the animals stretch themselves out and become completely paralyzed. In the last stage convulsions may be seen but that is very rare. Death, as a rule, occurs in the fifth to seventh day after the onset of the disease. In rare instances it may last ten days. Variations may occasionally occur in the regular course of the disease; for instance, paralysis of the jaw has not been observed, and difficult breathing has been observed for hours before death.

#### B. DUMB RABIES

This is distinguished from furious rabies by the fact that the nervous symptoms appear early in this type. First, there is par-

alysis of the muscles of the lower jaw. The mucous or saliva runs out of the opened mouth, and the desire to bite is entirely absent, although under certain conditions when the mouth is forcibly opened the animal will be able to bite. The voice is also changed but it is very rarely heard. There is a loss of appetite, the animal being unable to seize or swallow foreign bodies. In this quiet form the three stages follow very closely on each other, the course of the disease being very rapid, and death, as a rule, appears in two or three days, never over five. With dumb rabies, the owner often thinks that the dog has a bone in his throat.

#### 3. CATS

Cats present symptoms much like those in the dog, except there is less tendency to wander. The cat will hide in a dark corner or under furniture from which it will jump and attack persons who come near. Its voice becomes hoarse. The appetite is lost. It gets thin and paralysis occurs. Death results in a few days.

Oats.

The Wild Oat—Our Worst Weed  
The Wild Oat, it is generally  
agreed, is the worst weed in West-  
ern Canada.

During the past 7 or 8 years there has been a tremendous increase in the interest in weed control due to the development of various weed control chemicals. Most of the common broad-leaved weeds can now be controlled effectively and economically by chemical means. So far the wild oat has remained unaffected by any chemical except the more costly soil sterilants.

Many Chemicals Tested. This situation may not, however, last much longer. Weed investigators, encouraged by their success with chemicals on other weeds and alarmed by the terrific losses due to wild oats, are concentrating their efforts toward the development of a chemical that will control this costly weed. In the meantime cultural methods provide the only means of controlling wild oats.

Cultural Control. A study of wild oat seeds shows that they germinate readily during the cool weather of early Spring. Few will germinate, however, after the temperature of the soil has reached 50°F or higher. This occurs usually between May 15 and June 1st, depending on the season. Early Spring tillage and delayed seeding of an early maturing crop will destroy many wild oats, and allow a relatively clean crop to be grown even on heavily infested fields.

Clean, Good Seed Important. Seed drill surveys have shown that millions of wild oat seeds are returned to the soil in "dirty" seed each year in Western Canada. Clean, high-germinating, properly treated seed is a vital link in weed control. Good seed and efficient and timely cultivation will reduce the population of wild oats and other weeds in growing crops, and make for a better, more prosperous agriculture in Western Canada.

Copies of our revised circular "Wild Oat Control by Cultural Methods" may be obtained, free of charge, through local Line Elevator Agents or from Line Elevators Farm Service, Winnipeg or Calgary.

# IT'S CANADA'S BIGGEST JOB!

There is nothing more important, and in these uncertain days, nothing more urgent than the job of seeing that Canada stays free. It's Canada's biggest job.

There are many people who are working actively that we may continue to live and work and worship our own way. One of the most important of these is the Canadian Soldier. More men are needed immediately in the Canadian Army Active Force. Do you meet the requirements? Will you serve Freedom?

## OUR COMPLETE SHORT STORY—

## CAREER'S THE THING

By MEYER HANSON

BEN HUMPHREY leaned against a stanchion. Not so many years ago he and a helper had milked fifty head of cattle twice daily; he had no man now, and there were only eight cows to tend, yet it seemed to require a lot of effort, or else he tired quickly.

Ben, at 65, was willing to admit he couldn't do the day's work he'd done ten years before; it didn't worry him—he was fairly well fixed financially and he aimed to cut down on his chores. But he was worried about Martha.

Their six children had grown up and away. They had their own homes and lives. And Martha, as the years wore on, had grown quieter, content to sit in the rocker by the window after her household duties.

She'd had a bad cold only last week and Ben had called young Doc Maurice, who had taken over Doc Spruce's practice. It was what young Doc had said that troubled Ben. Not about the cold, but about Martha in general.

"We'll have her cold knocked out in a jiffy," Doc had said. "But about this other thing"—he'd shaken his head, "when a person gets along in years—there's nothing to be done."

Ben's gnarled fist tightened on the worn stanchion. He didn't hold with young Doc. Martha had years of ripe living if she would only look ahead, not behind.

A few days later when the car stopped, Ben was a little excited, be-

cause visitors were few and far between. Martha was in the kitchen preparing the evening meal.

The couple in the car looked about 35, their two boys eight and ten—and they were hungry. They'd taken the river road instead of the main highway, they said, because of the scenery. But there wasn't a road-stand or restaurant anywhere.

"I'll ask Martha," Ben said, not very promisingly.

"How many did you say there were?" Martha asked without enthusiasm, stirring the simmering soup.

"Four—two grownups, two boys. Of course, Martha, if it's too hard—"

"We've never turned anyone away from our door," Martha said sharply. "This roast is big enough, heaven knows. I'll just put on some more potatoes."

The meal was a success. Martha didn't eat much—and Ben couldn't, worrying about her. But the visitors stowed away the food like it was going to be their last meal for days. Their compliments brought a flush to Martha's wrinkled cheeks, the first bit of excitement in her for a long time.

"I'll help do the dishes," Ben offered after their guests left.

"No, I can manage. You've done your work for the day." And she added, "Imagine, their wanting to pay."

"They'd pay two-three dollars each for one in some places," Ben declared. "And not half as good, neither." Martha gasped. She pointed to where she'd just lifted a plate. "He left a five-dollar bill! What will we do with it?"

"Can't very well send it to him," Ben tugged at his earlobe. "No address. Guess you'll just have to keep it."

"Five dollars, for one dinner!" Martha ejaculated. "It does seem a lot."

"That's what he thought it was worth," Ben pointed out.

The river road wasn't travelled much. Yet there were always a few hardy souls with an eye for beauty who took the longer way.

"It's strange, Ben," Martha remarked after their paying guests had gone. "All these years no one ever did stop for dinner, and here this is the second carful this week."

"Maybe those other people have been telling about their wonderful meal."

Busy at the stove, Martha asked, "Shall we tell them not to leave money?"

"They'd pay elsewhere. After all, it's not easy for you—"

"I may not be as spry as I used to be," Martha retorted, "but I'm still able to get a meal together."

There was hardly an evening in the weeks that followed that the Humphreys didn't have guests. All day long Martha would bustle about baking pies and cakes and some of her own special fluffy egg bread. If she missed sitting in her rocker by the window, she never mentioned it.

The tin box in the pantry grew full. Watching Martha count it, Ben chuckled. "Going to buy yourself a new dress?" So young Doc thought Martha should just sit around and stagnate, eh? Ben didn't consider himself learned, but he didn't agree at all with Doc. He'd reasoned Martha needed a new interest in life. A little more reasoning and Ben had secretly painted a small sign and stood it squarely by the road at the bend before their lane.

Hungry. Far away from home?

Have dinner with Mrs. Humphrey between 6 and 7 p.m.

Turn left at the next lane.

And Martha had never questioned why so many people were stopping by. Ben chuckled again. "Maybe you'll get yourself a new hat, too, Martha," he suggested.

**CARNIVAL QUEEN** — Miss Edmonston of 1953, 17-year-old Carol Taylor, has been chosen to reign as queen of the Banff Winter Carnival next year. One of the most famous of all winter carnivals in Canada, the Banff festival of fun which lasts one week, features sports competitions, games, beauty parade and many other events designed to entertain spectators.—Central Press Canadian.

## Funny and Otherwise

What this country needs is someone who knows what this country needs.

Son—"Dad, what do you call a man who drives a car?"

Dad—"It all depends on how close he comes to me, my boy."

"Exciting things are always happening to my friend Walter," a whimsical journalist reported recently. "The other day he was sending a suit to the cleaners when he felt in the pocket of the coat and discovered \$100 in bills."

"Gosh!" rejoined an excited listener. "That was quite an experience!"

"Yes, it was," the newspaper man agreed, "and do you know, not one of them was receipted!"

Jones: I heard that your wife came from a very large family.  
Bones: Came from. Nuts! She brought it with her.

Sign in an ammunition dump: "If you must smoke, do so; then leave by the exit that will suddenly appear in the roof."

Mrs. Brown: Did you scold your little boy for imitating me?

Mrs. Green: Yes, I did. I told him to stop acting like an idiot.

First Actor: I can't get into my shoes.

Second Actor: What! Feet swell too?

"He's not such a big fool as he was."

"Has he got wiser?"

"No—thinner."

A bumptious fellow was giving evidence in a police court.

"You say you stood up?" asked the magistrate.

"I said," retorted the conceited one, "that I stood. If one stands one must stand up. There's no other way of standing."

"Oh, isn't there?" replied the magistrate. "Pay \$10 for contempt of court, and . . . stand down!"

Sign in beauty parlor window: Don't whistle at a girl leaving here. She may be your grandmother.

"The bravest man I ever knew?" said the explorer. "He was the chap who took a taxi to the Bankruptcy Court and invited the driver in as a creditor."

"I advise you to take a hot bath before retiring."

"But doc, I hadn't figured on retiring for another 10 years."

## Helps You Overcome Itching of Piles Or Money Back

You do not have to be tortured and embarrassed by the itching soreness and burning pain of piles any longer. Here is real help for you. Get a package of Hem-Roid, an internal pile treatment, at any drug store and use as directed. You will be pleased at how quickly your pile trouble is relieved. Only \$1.50 for the big 60 tablet package. If you are not 100% pleased after using Hem-Roid 2 or 3 days, as a test, ask for your money back. Refund agreement by all drug stores.

## Alaskans Use Planes In Fight On Wolves

JUNEAU, Alaska.—Alaskan wolf hunters are taking to the air early this year to destroy the hungry caribou-killers of the Alaska Peninsula.

Several light planes, carrying pilots and gunners, are hunting under the direction of M. W. Kelly, fish and wildlife predator control supervisor. The inroads of wolves on the dwindling herds of Grant caribou set off the aerial campaign.

Such hunting was successful in the Umiat region of Alaska, above the Arctic Circle last winter. The operation destroyed 259 adult wolves which could have killed up to 15,000 caribou a year.

## "SALADA" TEA BAGS

## Finer, tastier BREAD

Yours, with wonderful fast-rising DRY Yeast!

## WHOLE WHEAT BREAD

• Combine 3 c. boiling water, 1/4 c. granulated sugar, 4 tsps. salt and 1 tbs. shortening; stir until sugar and salt are dissolved and shortening melted; cool to lukewarm. Meanwhile, measure into a large bowl 1 c. lukewarm water, 1 tbs. granulated sugar; stir until sugar is dissolved. Sprinkle with 3 envelopes Fleischmann's Fast Rising Dry Yeast. Let stand 10 minutes, THEN stir well.

Stir in cooled sugar-shortening mixture. Combine 5 c. once-sifted bread flour and 5 c. whole wheat or graham flour. Stir about half of the flour into yeast mixture; beat until smooth. Work in remaining flour and add additional bread flour, if necessary, to

make a soft dough. Knead on lightly-floured board until smooth and elastic. Place in greased bowl and grease top of dough. Cover and set in a warm place, free from draught. Let rise until doubled in bulk. Punch down dough, grease top and again let rise until doubled in bulk. Punch down dough; turn out on lightly-floured board and divide into 4 equal portions; form into smooth balls. Cover lightly with cloth and let rest for 15 mins. Shape into loaves; place in greased loaf pans (4 1/2" x 8 1/2"). Grease tops, cover and let rise until doubled in bulk. Bake in hot oven, 400°, for 20 mins., then reduce oven heat to moderate, 350°, and bake about 20 minutes longer.

## Canada's Health

### SALAD DAYS— ALL YEAR ROUND

Salads are just as valuable during the winter as during the summer. In fact, when there is not as much fresh fruit available, fresh green vegetables are even more necessary to the daily diet. There is no set rule as to what should constitute a salad—it can be a happy mixture of half a dozen vegetables or just two or

different raw vegetables, such as grated carrot, parsnip, turnip or even finely chopped spinach, the salad can be a very versatile dish with a new appeal to the family. Chives, parsley or watercress, cut into cottage cheese, make an extra special addition to the salad.

### VEGETABLE HINTS

When preparing vegetables for cooking, cut all pieces the same size so that the sections cook

uniformly. Too long boiling or stewing not only spoils the flavor but also destroys much of the vitamin content. The minimum amount of water should be used and any liquid left after boiling should be added to soups or gravy to salvage the minerals that have been extracted through boiling.

### DANGEROUS GADGETS

A baby's bottle should never be propped up on any object while the infant is feeding; a

baby may actually drown from the flood of liquid entering his lungs, if he is not big enough to move away from the bottle by himself. He should be held all the while he is feeding, or at least watched constantly, since such accidents can happen quickly.

### OVERSTUFFED

When it is your own poundage, you can have too much of a good thing. The overweight person is not as healthy as the one less

luxuriously upholstered and he is far more susceptible to a variety of ailments. But, if the abundance of flesh is there, it is not advisable to start in on a reducing program that relies upon malnutrition for its effects. By going without necessary food, the weight will certainly decrease—but so will the person's stamina and ability to resist disease. The safe way is to consult the doctor and then follow the program he prescribes—faithfully, with no sideslipping.

A General Motors Value

...WITH A THRILLING NEW

AND A NEW 1953  
"ROCKET"!

Hold fast! Hold tight! Hold the presses! Hold everything until you see the headline cars for '53! They're Oldsmobile's sensational Rocket "88" and Classic "98" with a great new lineup of stellar "power" features!
